The ExtraCare Charitable Trust enables older people to enjoy a healthier, active and more independent lifestyle within a network of inspirational communities.

The Charity operates 11 retirement villages, 18 housing schemes and 61 Charity shops across the Midlands and the North West.

Each ExtraCare resident can expect a safe, secure future, living in a spacious and affordable home with award-winning care and a wide range of social opportunities to enjoy. Our Charity has a mission to create better lives for older people - **come and join us.**

£132 MILLION BROADBAND PROJECT TO TRANSFORM CORNISH ECONOMY

Cornwall and the Isles of Scilly are set to become one of the best connected locations in the world under an ambitious £132 million project announced today by BT and Cornwall Council and supported by European funding. This investment makes Cornwall and the Isles of Scilly an exciting business opportunity for all our CP and ISP customers. It avoids infrastructure duplication and ensures services are available on an open, wholesale basis to all communications providers, ensuring local homes and businesses benefit from a competitive market.

Cognisco Knowledge Survey on Engineering Policies and Processes - Mozilla Firefox
http://m400.cognisco.com/bae

BAE SYSTEMS

Welcome to your Cognisco Knowledge Survey on Engineering Policies and

Log in Support

Hello and a very warm welcome to your **Cognisco Knowledge Survey** on Engineering Policies and Processes.

I'm Peter Fielder, MD Performance Excellence at BAE Systems, and I have a direct interest in ensuring that this knowledge assessment is available to you.

This is because I believe we have a responsibility in the interests of both ourselves and our shareholders to ensure we do everything in our power to do right by our customers, the public and the environment.

It is also because I have a duty to our Line Leaders through the Functional Councils to ensure they have appropriate support for their Businesses. Our Line Leaders are responsible for ensuring their staff know and understand the policies and processes relevant to the conduct of Lines of Business they are leading. Furthermore, evidence and assurance of this knowledge and understanding is required for audit purposes, all of which is designed to ensure that we are operating within a robust business management system.

This assessment is concise, straightforward and an important element of this approach. I hope you find it valuable, and look forward to reaping the rewards of ever higher standards in our Company.

This survey is designed to find out if engineers have the information that they need in order to comply with the Engineering policies and process requirements of BAE SYSTEMS' Operational Framework. How' compliance is achieved will depend on specific roles and the Business Management System of each Line of Business, and may be the subject of further learning.

You will be asked to answer questions to test your understanding of:

1. Product Safety Policy
2. Corporate Flying Standard Policy
3. Environmental Policy
4. Design Review Process
5. Technical Bid Review Process
6. Effective tailoring and application of Core Engineering Processes

The six sets of questions are all multiple response and you need to address each response with an answer before continuing to the next question. It is important to remember that each response to a question should be evaluated on an individual basis as to whether it is correct or incorrect.

As you go through the survey there may be some areas that you are either not familiar with or unsure about. In these instances you have the option to say "I don't know" by selecting the question mark. There is no negativity associated with selecting this option.

Another important aspect of this assessment is the requirement to place a level of confidence whenever you select a tick or a cross by any response. You do not need to give a level of confidence if you select the question mark by any response.

The confidence slider is your opportunity to say how confident you are about applying your understanding of the skills and knowledge to that scenario or situation in the response.

Click the log in button to gain access to the assessment by entering the username and log-in identification password supplied to you. Then follow the instructions which automatically appear in the pop up screen when you first log in. Please take time to read these instructions in order to get the most out of the survey.

If you need a reminder about the content of the policies and process concerned, please feel free to click on this link: XXXXX to the e-learning that supports this assessment.

Thank you for participating in this programme. [top](#)
